PIANT STANSEN LASEREN SNIJDEN

❶ Printing sheet

**Printing matter supplied by you.
Indicate feed guide.**

❷ Document for cutting

Robert Brekelmans

Robert Brekelmans

**1x document *PDF with the total image including the laser cutting elements.
Paper size of document must be equal to the printing sheet.
All printing marks except cropping and folding marks must be removed!**

❸ Result

**1x document: *AI, *EPS or an Adobe illustrator PDF with ONLY the image of the elements (saved in an early version of illustrator).
Paper size of document must be equal to the printing sheet.
In the document the paper size must be a white path with no line.**

General guidelines for delivering documents:

closed = **good**   open = **wrong**

placing paths on top of each other = **wrong**

one path = **good**

nesting
gap 5 mm = **good**   outside limits 10 mm= **good**

10 mm
5 mm

ABCD Texts must be converted to curves (paths). So there are no fonts/letters available anymore.

For a price indication we need a PDF file like nr.2.
Pls. specify which parts must be laser cutting.

Files must be Vector-based (line drawing).
Therefore no photo (pixels).

Drawings can best be made in 2 colours.
The background (the paper) in white.
The elements which must be removed from the material in black.
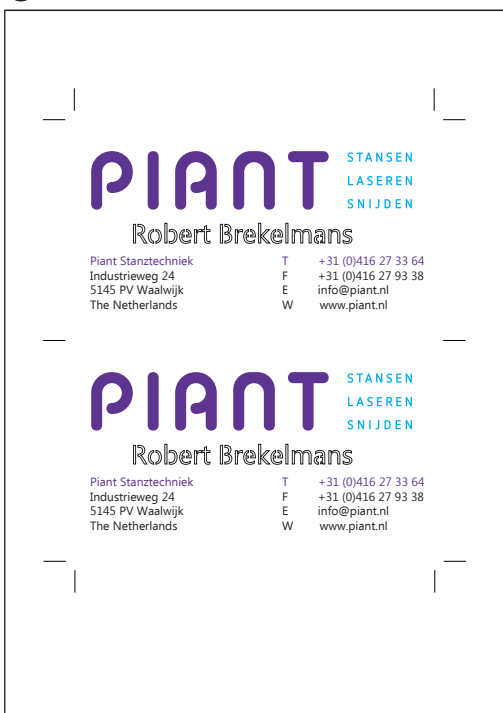

All clipping masks must be removed.

All elements in the drawing must be closed paths. Do **NOT** use lines.
Lines must be changed into paths.

Info like crop and folding marks can stay.

**Texts must be converted to curves (paths). So there are no fonts/letters available anymore.**
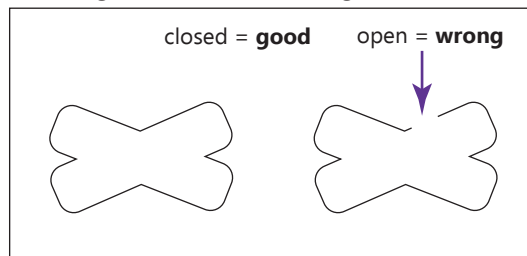

In the paths use as less points as possible. All edges will become straight and smooth.
